TWO-DAY INTERNATIONAL COURSE - BARCELONA

Rethinking Orthodontics

Where Aligners Meet Skeletal Anchorage

With Prof. Dr. Benedict Wilmes

DATES

5 – 6 March 2027

VENUE

Hotel Catalonia
Barcelona Plaza

FORMAT

Lectures &
case-based discussion

LANGUAGE

English, with
simultaneous translation
into Spanish

01 / THE COURSE

Skeletal anchorage — the update for digital techniques and optimal aligner & TAD combinations

For the first time in Spain, Prof. Dr. Benedict Wilmes will lecture a complete two-day course. Developer of the Beneslider and the Benefit mini-implant system, and one of the most influential voices in skeletal anchorage, he comes to Barcelona to share his full approach to TADs and aligner therapy — a unique privilege to learn directly from him over two intensive days.

An increasing number of patients seek treatment with aligner therapy, yet bodily tooth movement is challenging when relying on aligners alone: long treatment times, high compliance demands and the side effects of intermaxillary elastics, such as anchorage-tooth shift, midline shift, arch rotation and transverse occlusal canting. To avoid this anchorage loss and the high demand on elastic wear, orthodontic mini-implants may be used.

Prof. Dr. Benedict Wilmes will give a two-day complete overview of TADs, focusing on the rationale, appliances, biomechanics and possibilities when combining them with aligners.

02 / THE LECTURER

Prof. Dr. Benedict Wilmes

One of the most influential voices in skeletal anchorage, Prof. Wilmes is the developer of the Beneslider and the Benefit mini-implant system, and a leading authority on palatal TADs, digital insertion planning and CAD-CAM appliances. He lectures worldwide on combining mini-implants with aligner therapy to make complex tooth movements predictable.

03 / THE SETTING

Meet in Barcelona.

VENUE	Hotel Catalonia Barcelona Plaza
GUEST DISCOUNT	The hotel offers special rates to course participants until December 5th.

Day One — 5 March 2027

09:00 – 10:30	The rationale of using TADs in orthodontic practice Direct and indirect anchorage
10:30 – 11:00	Coffee break
11:00 – 12:30	Lower molar mesialization Mini-implants with abutments
12:30 – 13:30	Lunch
13:30 – 15:00	Upper molar distalization
15:00 – 15:30	Coffee break
15:30 – 17:00	Upper molar mesialization

Day Two — 6 March 2027

09:00 – 10:30	En-masse retraction Rapid palatal expansion and early Class III treatment
10:30 – 11:00	Coffee break
11:00 – 12:30	Molar uprighting Molar intrusion
12:30 – 13:30	Lunch
13:30 – 15:00	TAD insertion: rationale, biomechanics and case documentation Beneslider design, indications and orthodontic application
15:00 – 15:30	Coffee break
15:30 – 17:00	Alignment of impacted teeth Temporary pontics using TADs

05 / REGISTRATION

Seats are limited — early registration is recommended

Barcelona · 5 – 6 March 2027

Course language: English, with simultaneous translation into Spanish

Early-bird until 1 December 2026 — **600 € + VAT**

Registration fee — **750 € + VAT**
